Top Skills

Artificial Intelligence (AI)

Front-End Development

Software Development

Certifications

FPGA Design Flow in Verilog HDL and Hands-on Practice on Altera DE-Series Kits

Certificate of Accomplishment – NASA Space Apps Challenge 2026

Certificate course in C programming language

Pallotti National HackFest 2026

Inter Collegiate Hackathon 2026 – Certificate of Participation

Shravani Kumbhalkar

Aspiring Embedded Systems Engineer | C++ & Python Programmer | Hardware–Software Integration |

Nagpur, Maharashtra, India

Summary

I am a 2nd-year Electronics and Telecommunication Engineering (ENTC) student passionate about programming, embedded systems, artificial intelligence, and hardware–software integration. I enjoy exploring emerging technologies and developing practical solutions to real-world problems.My technical interests include C ++, Python, embedded systems, AI, and software development. I am continuously strengthening my programming, problem-solving, and project development skills while building a strong foundation in engineering and technology.Through Arimini’s 30-Day Industry Readiness Program, I gained hands-on experience in Python application development, debugging, and problem-solving. I also contributed to a Python-based Attendance Management System, applying my programming knowledge to practical application development.One of my key achievements is being part of Team Vortex X, which won the Best Use of AI award at Hyperthon 2026, conducted in collaboration with NASA Space Apps and IETE at Priyadarshini College of Engineering, Nagpur. This recognition reflects my interest in AI-driven innovation, creative problem-solving, and collaborative development.I am committed to continuous learning, building meaningful projects, and expanding my technical expertise. I welcome connections with recruiters, engineers, and technology professionals to exchange ideas, collaborate on innovative projects, and explore opportunities to contribute to the technology industry.Technical Skills & Interests: C++ | Python | Artificial Intelligence | Embedded Systems | Software Development | Hardware–Software Integration | Problem-Solving Email: shravanikumbhalkar84@gmail.com

Education

Priyadarshini College of Engineering Hingna Nagpur

B.Tech · (2025)
